investing in debt and equity instruments only

October 2026

How does our brain process and make decisions?

Left Brain

- Slow
- Deliberate
- Analytical
- Conscious
- Tires quickly
- Lazy

Driven By
Information, Data,
Logical Reasoning

Right Brain

- Fast
- Automatic
- Intuitive
- Instinctive
- Subconscious
- Involuntary

Driven By
Emotions And Intuitions

| Our emotions often overpower our logical thinking

Our brain is a complex organ that has evolved over millions of years to help us navigate the challenges of life

It has developed advanced logical thinking abilities

However, it also retains more primitive, emotional, and instinctual responses that can sometimes override our logical thinking

Emotions frequently steer us away from making rational decisions

How our emotions override logical reasoning:

Procrastination

Starting a task early and working on it consistently is the logical approach, but our emotions often lead us to procrastinate until the last minute.

Spending Money

Making impulsive purchases or spending beyond our means because of the momentary joy of acquiring something.

Skipping Exercise

The emotional pull to stay in our comfort zone can make us skip workout sessions.

Stress Eating

When stressed, we might indulge in comfort foods even though we're aware that it's not a healthy coping mechanism.

Our emotions override logical reasoning while making investment decisions as well

We get swayed by **Greed** and **Fear** while investing

What we should do

What we end up doing

Our investment decisions get impacted due to various emotional biases

Regret Aversion Bias

Clinging to loss making choices to avoid regret leads people to continue with loss-making decisions in down cycles.

Trend-Chasing Bias

Focusing on past performance, ignoring other factors.

Loss Aversion Bias

Fear of loss prevents from seeking gains.

Herd Mentality Bias

Following the crowd without independent analysis.

Market volatility impacts our emotions & behaviour

People feel optimistic and positive when the market peaks and anxious when the market nose-dives

**Returns from September 30, 1995, to September 30, 2026. Source: ICRA MFI Explorer, Internal Analysis. Past performance may or may not be sustained in future Data as on September 30, 2026.*

Introducing
Bajaj Finserv

Balanced Advantage Fund

(With Behavioural Edge)

Market trends basis fundamentals and liquidity

Approach

What moves the market?

Fundamental Element

Behavioural Element

The stock market is the story of cycles and of the human behaviour that is responsible for overreactions in both directions.

- Seth Klarman

| With Bajaj Finserv **Balanced Advantage Fund**,
emotions take a back seat, and logic steers the ship.

**Indicative allocation and this can change based on market conditions and investment opportunity available *Includes Net Equity & Arbitrage

The fund model will determine the market's intrinsic value & make behaviour-based adjustments. It will change the asset allocation accordingly and rebalance the portfolio from time to time.

Bajaj Finserv Balanced Advantage Model = Fundamental + Behavioural

Bajaj Finserv Balanced Advantage Fund - Model Overview

Satellite Allocation basis Market Sentiment Lead Indicator

Currency

Commodity

Fixed Income

Equity

- Estimates market's intrinsic value: Forward EPS, growth premiums, and interest rate.
- Gives core allocation signal.
- Sentiment analysis: Using commodities, currency movements, yield indicators.
- Signals early warnings of market cycles, both bullish and bearish.
- Together, the two broad indicators confirm and indicate market entry and exit points.

Which fundamental elements move Nifty 50?

- Nifty 50 has a **very weak correlation with GDP** – constituents and weights
- But, has a **strong correlation** over long term to **earnings**

Ideal Nifty 50*

=

Ideal Earnings* X Ideal Valuation*

**Ideal Earnings is
Forward Earnings**

**Ideal Valuation is
Comparative and
not Absolute**

*Based on Internal Analysis

Factors		Interplay
	Currencies	Certain currency pairs reveal the mood and the bias of the currency market whether they are in risk-on mode or are operating as safe haven.
	Commodity	Studying commodities price movement between energy, industrial, precious, and soft commodities reveals the broad commodities view regarding the economy and the business outlook across the world.
	Bond	Spread between the emerging and developed market; corporate bond and government securities; slope of the yield curve; captures the sentiment of bond traders and prevailing global liquidity.
	Equity	Equity investors reveal their view and sentiment about the equity market through choices of market cap and position between different sectors.

Fundamental Elements

Ideal Valuation (Comparative)

P/BV

- Values Assets
- Less volatile than earnings but way less representative
- Many businesses in Nifty 50 are asset-light

Thus, P/BV can not be used broadly for all sectors

M-Cap/GDP

- Ignores quality of business, keeps trending higher

Thus M-Cap/GDP can not be used broadly for all stocks/businesses

**Hence P/E :
Though tough,
remains Appropriate!**

P/BV- Price/Book Value, M-Cap – Market Capitalization, GDP – Gross Domestic Product, P/E – Price/Earning

*Based on Internal Analysis

Ideal Earning*
One year Forward
Earning

Ideal Valuation*
One Year Forward
P/E

How does it work?

The fund follows a proprietary INQUBE investment philosophy that combines informational, quantitative, and behavioural edges for competitive performance.

Portfolio construction approach for equity & debt components

Portfolio Approach	
 Equity Portfolio	• Flexi cap approach • Prefer large cap orientation
 Debt Portfolio	• Short to medium term duration • Investment in highly rated securities • To anchor and support core performance

Who Should Invest?

Investors who

Want to add dynamic asset allocation to their portfolio

Want diversification in their portfolio

Seek professional fund management

Want potential capital appreciation with mitigation of downside risk

Have long-term investment horizon

Dynamic Asset Allocation

Navigate Market Volatility

Optimizing Returns

Risk Management

Long-Term Perspective

Adapting to Change

Tax Efficiency

BAJAJ FINSERV BALANCED ADVANTAGE FUND (With Behavioural Edge)

An open ended dynamic asset allocation fund investing in debt and equity instruments only

October 2026

Combining fundamental and behavioural finance principles provides a key advantage in managing investments. Our proprietary asset allocation model at Bajaj AMC (Formerly known as Bajaj Finserv AMC) is based on those two elements, namely fundamental analysis and behavioural insights. It ensures that our Balanced Advantage Fund is well-positioned to navigate market complexities and deliver long-term value to our investors. By understanding the interplay of various market factors, we can make informed decisions that align with our investors' goals, fostering financial growth and stability. This unique approach helps us determine the optimal asset allocation between equity and debt, providing an edge for our investors.

Fundamental Indicator:

Our fundamental indicator focuses on the Nifty 50 Index, analysing its ideal earnings and valuations. Ideal earnings are forward-looking estimations, while ideal valuations are comparative, offering a realistic assessment rather than absolute measures. This robust analysis forms the backbone of our model, ensuring a sound foundation for asset allocation.

Behavioural Indicator:

The differentiation in our model lies in the behavioural indicator, which measures behavioural and sentimental trends in the market by monitoring four key factors: currencies, commodities, bonds, and equities. Let's explore how each of these factors contributes to our asset allocation strategy:

- Reflect risk appetite.
- Risky currencies signal optimism; safe havens show caution.
- Helps predict capital flows into Indian equities.

- Rising prices = strong economy; precious metals up = uncertainty.
- Guides sector allocation (energy, industrials) based on economic cycles.

- Yield spreads & curves show investor sentiment and liquidity.
- Narrowing spreads = confidence, steep curve = growth expectations.
- Guides equity investment in growth sectors.

- Large-cap focus = stability; small/mid-caps = higher risk.
- Sector rotations signal where investors see growth or safety.
- Informs strategic asset allocation.

The sequence, relationship and nature of trends in these assets helps understand and anticipate market movements driven by psychological factors, leading to more informed and effective investment decisions. By integrating behavioural insights with fundamental analysis, our model offers a comprehensive approach to asset allocation, optimizing returns while managing risks.

SCHEME VS BENCHMARK

DISCLAIMER: Returns <1 Yr Absolute, ≥ C AGR. Absolute Return and Annualised Return are calculated on a point to point basis. Ratios are calculated for a period of 3 years with monthly rolling and monthly frequency and Risk-free rate of 5.07% is based on the TREPS rate as on the last working day of the month. For Bajaj AMC schemes, ratios are calculated since inception with monthly rolling and monthly frequency. Max Drawdown is calculated within the one-day range. Returns for global funds pertains to previous business day as NAVs are disclosed at one day lag.

Data as on 30th September, 2026 | Source: Internal Analysis, MFI360, Bloomberg | Past performance may or may not be sustained in future.

STANDARD DEVIATION

With a standard deviation of 9.85% versus 6.95% for the benchmark, the scheme has delivered robust risk-adjusted returns.

A **beta of 1.36** since inception highlight its resilient profile and consistently outperformed through prudent portfolio construction and stock selection.

Risk Free Rate of Return: 5.07% | Data as on 30th September, 2026; calculated since inception | Source: Internal Analysis, MFI360, Bloomberg | Past performance may or may not be sustained in future.

With a 25.54% EPS growth outlook and a comparatively lower PEG ratio of 0.98, the fund demonstrates a valuation edge versus the benchmark.

With an expected EPS growth of 25.54% over FY26–28 versus 9.03% for the benchmark, the fund reflects a portfolio positioned for robust earnings growth.

*Expected

With a P/E of 31.06% versus 18.11% for the benchmark, the fund reflects a portfolio of companies with robust growth potential.

The fund’s lower PEG ratio of 0.98 versus 1.84 for the benchmark indicates growth potential at more reasonable valuations.
