Risk Return Matrix of Equity Funds

India poised to grow with Champions of Corporate India at the forefront

Gearing up for India's Golden Era

GDP Growth Rate (%)

Source: IMF World Economic Outlook, October 2026

- India has historically exceeded global performance estimates on growth.
- Large caps are likely to be major beneficiary from India's GDP (Gross Domestic Product) growth through increased consumer demand and expanded investment opportunities.

Why Invest in Bajaj Finserv Large Cap Fund?

If You Buy The Index, You Cannot Beat The Index

- **Bajaj Finserv Large Cap Fund will aim to have a high Active Share which would indicate that the fund will take high conviction bets in select stocks for growth.**
- **Active Share measures the percentage of stock holdings, that deviates from the benchmark index.**
- **We believe and practice that “if you buy the index, you cannot beat the index.”**
- **Traditional indices reflect the past, but our investment strategy looks ahead, positioning your portfolio for future opportunities and growth.**

How Active Share Works

Concentrated Portfolio of 25 to 30 stocks for optimum risk return reward*

Stock Specific Risk

Research indicates that holding 20-30 stocks provides statistically significant **diversification** benefits, reducing portfolio-specific risk.

Introduced by Nobel laureate Harry Markowitz in 1952, **MPT (Modern Portfolio Theory)** optimizes expected returns for a given risk level by **diversifying** across different asset types.

Our strategy is to build a portfolio of approximately **25 to 30 stocks***, aiming for optimal **risk diversification** consistent with **MPT** principles.

*The above investment strategy is based on prevailing market conditions and opportunities available at the time of investment. The Fund Manager reserves the right to change the count of stocks invested based on the SID and the opportunities available at the time of investment done, Position in derivatives will not be considered for the computation of total number of stocks in the portfolio

#The Capital Allocation Line (CAL) is a line that graphically depicts the risk-and-reward profile of assets and can be used to find the optimal portfolio.

Our strategy

**Highly
Concentrated
portfolio** with high
conviction in stock
selection

**High Active
Share** with aim
to outperform
the benchmark
index over
long-term

◆ PROFITABILITY

◆ MANUFACTURING

◆ SUSTAINABILITY

Bajaj Finserv Large Cap Fund reflects a balanced yet growth-oriented approach with a strong emphasis on market leaders across diversified sectors. The core thesis focuses on long-term sustainability and market dominance.

Blue-chip stock allocation

Preference for established market players with potential for returns in long term, even in volatile conditions.

Pharmaceuticals & insurance exposure

Highlights belief in healthcare and financial protection as critical for navigating uncertainties and sectoral resilience.

Consumer staples & telecom presence

Indicates belief in steady cash flow generation due to recurring demand, regardless of market disruptions.

Digital economy exposure

Reflects optimism in India's tech-driven transformation and future growth potential.

The fund's portfolio is strategically constructed on the back of high conviction investment ideas. Furthermore, the overall philosophy revolves around balancing defensive plays with selective growth opportunities, underpinned by quality, market leadership, and sectoral resilience. The sequence, relationship and nature of trends in these assets helps understand and anticipate market movements driven by psychological factors, leading to more informed and effective investment decisions. By integrating behavioural insights with fundamental analysis, our model offers a comprehensive approach to asset allocation, optimizing returns while managing risks.

Active Share measures the percentage of stock holdings, based on weights (% to NAV) in a investment manager's portfolio that differs from the benchmark index.

- A low Active Share score is said to indicate that a portfolio manager is closely replicating the benchmark index and engaging in a passive investment strategy.
- A high Active Share score is said to indicate that a fund's holdings differ from the benchmark index and that the portfolio manager is actively managing it.

Active Share : 49%

Portfolio Overlap: 51%

SCHEME VS BENCHMARK

DISCLAIMER: Returns <1 Yr Absolute, ≥ C AGR. Absolute Return and Annualised Return are calculated on a point to point basis. Ratios are calculated for a period of 3 years with monthly rolling and monthly frequency and risk-free rate of 5.07% is based on the TREPS rate as on the last working day of the month. For Bajaj AMC schemes, ratios are calculated since inception with monthly rolling and monthly frequency. Max Drawdown is calculated within the one-day range. Returns for global funds pertains to previous business day as NAVs are disclosed at one day lag.

Data as on 30th September, 2026 | Source: Internal Analysis, MFI360, Bloomberg | Past performance may or may not be sustained in future.

STANDARD DEVIATION

■ BAJAJ FINSERV LARGE CAP FUND

■ NIFTY 100 TOTAL RETURN INDEX (TRI)

With a standard deviation of 12.77% versus 13.35% for the benchmark, the scheme has delivered robust risk-adjusted returns at lower volatility.

A **beta of 0.93** since inception highlight its resilient profile and consistently outperformed through prudent portfolio construction and stock selection.

Risk Free Rate of Return: 5.07% | Data as on 30th September, 2026; calculated since inception | Source: Internal Analysis, MFI360, Bloomberg | Past performance may or may not be sustained in future.

With a 27.88% EPS growth outlook and a comparatively lower PEG ratio of 1.07, the fund demonstrates a valuation edge versus the benchmark.

With an expected EPS growth of 27.88% over FY26–28 versus 9.00% for the benchmark, the fund reflects a portfolio positioned for robust earnings growth.

With a P/E of 34.59% versus 18.18% for the benchmark, the fund reflects a portfolio of companies with robust growth potential.

The fund's lower PEG ratio of 1.07 versus 1.87 for the benchmark indicates growth potential at more reasonable valuations.
