The AMC shall not charge any investment management and advisory fees for parking of funds in such short term deposits of scheduled commercial banks for the scheme.

<u>Rebalancing due to Passive Breaches:</u>
As per SEBI Master Circular for Mutual Funds dated March 20, 2026, as amended from time to time, in the event of deviation from mandated asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager shall rebalance the portfolio of the scheme within 30 business days. In case the portfolio of the scheme is not rebalanced within the period of 30 business days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee of the AMC. The Investment

	Committee, if it so desires, can extend the timeline for rebalancing upto 60 business days from the date of completion of mandated rebalancing period. Further, in case the portfolio is not rebalanced within the aforementioned mandated plus extended timelines, the AMC shall comply with the prescribed restrictions, the reporting and disclosure requirements as specified in the SEBI Master Circular for Mutual Funds dated March 20, 2026. In case the AUM of the deviated portfolio is more than 10% of the AUM of the main portfolio of the scheme. i. The AMC shall immediately communicate the same to the investors of the scheme after the expiry of the mandated rebalancing period (i.e. 30 Business Days) through SMS and email/ letter including details of portfolio not rebalanced. ii. The AMC shall also immediately communicate to the investors through SMS and email/letter when the portfolio is rebalanced. iii. The AMC shall disclose scheme wise deviation of the portfolio (beyond aforesaid 10% limit) from the mandated asset allocation beyond 30 business days, on the AMC 's website i.e. www.bajajamc.com. The AMC shall also disclose any deviation from the mandated asset allocation or prescribed prudential limits to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines. As per SEBI Master Circular for Mutual Funds dated March 20, 2026, the above timeline for rebalancing of portfolios will also be applicable on passive breaches of various prudential limits specified under SEBI (Mutual Funds) Regulations, 2026 and various circulars issued from time to time. **Rebalancing due to Short Term Defensive Consideration:** Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for short term and defensive considerations as per SEBI Master Circular for Mutual Funds dated March 20, 2026, and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.
Investment Strategy	The Bajaj Finserv Multi Cap Fund is an open ended actively managed equity scheme aims to provide long-term capital appreciation by investing 75-100% of total assets in equity and equity related securities of large cap, mid cap and small cap companies. The Scheme will maintain a minimum exposure of 25% of its total assets in each market cap category viz. large cap, mid cap and small cap. The scheme would invest in stocks across market capitalization and will remain diversified across key sectors and economic variables. The investment strategy for the Fund will focus on a contrarian approach within the equity segment, supported by our INQUBE investment philosophy. The strategy provides a structured framework to identify and invest in fundamentally strong companies that appear attractively valued. The contrarian strategy seeks to capitalize on market inefficiencies, such as

	potential undervaluation resulting from market overreaction to minor negative events or underreaction to significant positive developments. INQUBE, our investment philosophy, aids this approach by integrating disciplined research and rigorous evaluation of business fundamentals, management quality, and valuation to uncover opportunities in underappreciated sectors or stocks. The investment philosophy also helps in identifying market overreaction and underreaction. This enables the fund to capitalize on potential long-term growth opportunities that are not currently in market favor, including turnaround opportunities and businesses undergoing transformational change. The scheme may use Derivatives traded on recognized stock exchanges for the purpose of hedging, portfolio rebalancing and other purposes as may be permitted by SEBI. The scheme intends to use equity derivatives for purposes that may be permitted by SEBI Mutual Fund Regulations from time to time. Derivatives instruments may take the form of Futures, Options, Swaps or any other instrument, as may be permitted from time to time. For detailed derivative strategies, please refer to SAI. The Scheme may use SLBM to earn additional income for the scheme with a lesser degree of risk. Scheme may invest in the units of Mutual Fund schemes of Bajaj Finserv Mutual Fund or any other Mutual Funds in terms of the prevailing SEBI (MF) Regulations. The Scheme may also invest a part of its corpus in overseas markets in Global Depository Receipts (GDRs), ADRs, overseas equity, bonds and mutual funds and such other instruments as may be allowed under the Regulations from time to time. The scheme may take exposure in units of InvITs at an opportune time to generate income from infrastructure assets. Investing in units of InvITs has the potential to generate capital appreciation and regular income streams. **Fixed Income securities** The Scheme may also invest upto 25% of its total assets in Money Market Securities/Instruments (Money Market securities include cash and cash equivalents). The Scheme aims to identify securities which offer optimal level of yields/returns, considering risk-reward ratio. With the aim of controlling risks, rigorous in depth credit evaluation of the securities proposed to be invested in will be carried out by the Risk Management Team of the AMC. The credit evaluation includes a study of the operating environment of the issuer, the short as well as long-term financial health of the issuer. Rated debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC may consider the ratings of such Rating Agencies as approved by SEBI to carry out the functioning of rating agencies.

	In addition, the investment team of the AMC will study the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC would use this analysis to attempt to predict the likely direction of interest rates and position the portfolio appropriately to take advantage of the same. The scheme intends to use fixed income derivatives for purposes that may be permitted by SEBI Mutual Fund Regulations from time to time. Derivatives instruments may take the form of forward rate agreement, interest rate Swaps, interest rate future or any other instrument, as may be permitted from time to time. For detailed derivative strategies, please refer to SAI. Further, the Scheme may invest in other schemes managed by the AMC or in the schemes of any other Mutual Funds in terms of the prevailing Regulations. As per the Regulations, no investment management fees will be charged for such investments. The scheme may undertake repo transactions in Commercial Papers (CPs) and Certificate of Deposits (CDs). in accordance with the directions issued by RBI and SEBI from time to time. Such investment shall be made subject to the guidelines which may be prescribed. **Portfolio Turnover:** Portfolio Turnover is defined as the lower of purchases and sales after reducing all subscriptions and redemptions and derivative transactions there from and calculated as a percentage of the average assets under management of the scheme during a specified period of time. The scheme being an open ended scheme, it is expected that there would be frequent subscriptions and redemptions. Hence, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. If trading is done frequently there may be an increase in transaction cost such as brokerage paid etc. The fund manager shall endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. The Scheme has no specific target relating to portfolio turnover. **Investment Philosophy & Process:** Change is a principal quality of our business environment. There are obviously some businesses that adapt to these changes and ride these mega trends; while some end up losing their market share or profits, failing to adapt to these changes. It is important to consider these mega trends in investing. Structural changes demand that the incumbent, dominant companies, or business ecosystems, prepare for them if they want to stay in control of their market positions. Challenger companies, or up-and-coming business ecosystems often capitalize on these changes to enter existing markets or establish new ones. These moves are reflected in constantly shifting profit pools. In this fund, it is our endeavour to invest in companies that benefit from megatrends driven by social and demographic changes.

	INQUBE Investment Philosophy: The **INQUBE** fund management philosophy is based on first principles understanding of the market dynamics. The process at its core emanates from the studied realisation that fund alpha is an outcome of three edges namely the **In**formation edge, the **Qu**antitative edge and the **Be**havioural edge of the investment team. At its core, the INQUBE investment philosophy borrows from human nature and behavioral finance as a knowledge discipline. To realise the edge at the stock ideas hunting stage, the process shall involve a simultaneous application of top-down and bottom-up research to identify potential investments. It also involves evaluating business cycles and trends, such as momentum and trend reversal patterns, in order to identify potential investment opportunities and the stage of growth such potential ideas may be at. At the ideas analysis stage, the process involves analysing the business, management and valuation to guide the stock selection process. While undertaking the allocation decisions, the business shall be filtered on account of its size, quality, valuation, growth outlook, and risk; to measure and structure the allocation. The AMC/Sponsors/Trustee do not guarantee that the investment objective of the Scheme will be achieved. No guaranteed returns are being offered under the Scheme. The scheme intends to use derivatives for purposes that may be permitted by SEBI Mutual Fund Regulations from time to time. Derivatives instruments may take the form of Swaps or any other instrument, as may be permitted from time to time. The Margin for derivatives transactions may be placed in the form of such securities/instruments/deposits as may be permitted/eligible to be placed as margin from the assets of the Scheme. The securities/instruments/deposits so placed as margin shall be classified under the applicable category of assets for the purposes of asset allocation.
Risk Profile of the Scheme	**Scheme specific risk factors:** Equity and equity related instruments are volatile and prone to market fluctuations on a daily basis. The investments by the scheme in equity are subject to fluctuations and the units when redeemed may be worth more or less than their original cost. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme leading to subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates,

	currency exchange rates, changes in law/ policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities. **1. <u>Risks associated with investing in equities:</u>** • Investors may note that AMC/Fund Manager's investment decisions may not be always profitable, as actual market movements may be at variance with anticipated trends. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. • The value of the Scheme's investments may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down. • The Mutual Fund may not be able to sell securities, which can lead to temporary illiquidity. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to be collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon. • Investors may note that dividend is due only when declared and there is no assurance that a company (even though it may have a track record of payment of dividend in the past) may continue paying dividend in future. As such, the scheme is vulnerable to instances where investments in securities may not earn dividend or where lesser dividend is declared by a company in subsequent years in which investments are made by scheme. As the profitability of companies are likely to vary and have a material bearing on their ability to declare and pay dividend, the performance of the scheme may be adversely affected due to such factors. • While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges. The liquidity of the Scheme's investments is inherently restricted by trading volumes in the securities in which it invests.

	• Fund manager endeavours to generate returns based on certain past statistical trend. The performance of the scheme may get affected if there is a change in the said trend. There can be no assurance that such historical trends would continue. • In case of abnormal circumstances, it will be difficult to complete the square off transaction due to liquidity being poor in stock futures/spot market. However, the scheme will aim to take exposure only into liquid stocks where there will be minimal risk to square off the transaction. • Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme or business prospects of the Company in any particular sector. • Investments in equity and equity related securities involve a certain degree of risk and Investors should not invest in the equity scheme unless they can afford to take the risk of losing their investment. **2. <u>Risks associated with investing in fixed income:</u>** • Market Risk: The NAV of the scheme, to the extent invested in Money Market securities and other liquid instruments, will be affected by changes in the general level of interest rates. The NAV of the scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates. • Liquidity Risk: Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the scheme and may lead to the scheme incurring losses till the security is finally sold. The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio. • Price Risk: Government securities where a fixed return is offered run price-risk like any other fixed income security. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates. The new level of interest rate is determined by the rates at which government raises new money and/or the price levels at which the market is already dealing in existing securities. This risk is not unique to Government Securities. It exists for all fixed income securities. However, Government Securities are unique in the sense that their credit risk generally remains zero. Therefore, their prices are influenced only by movement in interest rates in the financial system.

	• Settlement risk: The inability of the scheme to make intended securities purchases due to settlement problems could cause the scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the scheme's portfolio due to the extraneous factors that may impact liquidity would result, at times, in potential losses in case of a subsequent decline in the value of securities held in the scheme's portfolio. • Regulatory Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the scheme. • Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed. • Credit Risk: Investments in Money Market and other liquid instruments are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer. • Risks associated with investment in unlisted securities: Subject to applicable Regulations, the scheme can invest in unlisted securities. These securities are subject to greater price fluctuations, less liquidity and greater risk than the listed securities. Except for any security of an associate or group company, the scheme has the power to invest in securities which are not listed on a stock exchange ("unlisted Securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market and there can be no assurance that the Scheme will realise their investments in unlisted securities at a fair value. • Different types of Money Market and other liquid instruments in which the scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Accordingly, the scheme risk may increase or decrease depending upon its investment pattern. e.g. money market instruments carry a higher level of risk than Government securities. Further, even among money market instruments, Commercial Papers (CPs) or Certificates of Deposit (CDs) which are A1+ rated are comparatively less risky than Commercial Papers (CPs) or Certificates of Deposit (CDs) which are A1 rated. Similarly, A1 rated Commercial Papers (CPs) or Certificates of Deposit (CDs) are comparatively less risky when compared with lower-rated money market instruments. • The AMC may, considering the overall level of risk of the portfolio, invest in lower rated securities offering higher yields as well as zero coupon securities that offer attractive yields. This may increase the absolute level of risk of the portfolio.

	• As zero coupon securities does not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. • The scheme at times may receive large number of redemption requests leading to an asset-liability mismatch and therefore requiring the AMC to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments. • Basis Risk: Basis risk arises due to a difference in the price movement of the derivative vis-à-vis that of the security being hedged. • Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security, this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security. • Counterparty Risk: This is the risk of failure of counterparty to a transaction to deliver securities against consideration received or to pay consideration against securities delivered, in full or in part or as per the agreed specification. There could be losses to the Scheme in case of a counterparty default. • Duration Risk: Duration risk refers to the movement in price of the underlying invested money market instruments due to movement/change in interest rates over different durations of maturity of instruments. In a portfolio of fixed income assets, the duration risk is measured by the average duration of the portfolio. Duration, expressed in years, is used as a measure of the sensitivity of the fixed income instrument to a change in interest rates. Usually, individual duration of fixed income instruments in the portfolio is calculated and the portfolio duration is weighted average of such individual instrument duration. A longer portfolio duration is associated with greater price fluctuations. A rise in interest rates could normally lead to decrease in prices and generally negatively affects portfolios having longer duration vis-a-vis portfolios having shorter duration. A fall in interest rate generally benefits portfolio having longer duration. A longer duration portfolio is also generally associated with greater volatility vis-a-vis a shorter duration portfolio.

Sovereign Risk: Sovereign risk is the likelihood that a Government will default on its loan obligation by failing to meet its principal payments or interest. It comes in different forms and may result in losses to investors in addition to negative political consequences. The Central Government of a country is the issuer of the local currency in that country. The Government (Central / State) raises money to meet its capital and revenue expenditure by issuing debt or discounted securities. Since payment of interest and principal amount has a sovereign status implying no default, such securities are known as securities with sovereign credit. For domestic borrowers and lenders, the credit risk on such sovereign credit is minimal, even lower than a security with “AAA” rating and hence commands a yield, which is lower than a yield on “AAA” security.
For details on risk factors and risk mitigation measures, please refer SID.

Bajaj Finserv Multi Cap Fund - Direct Plan is only for investors who purchase /subscribe units in a Scheme directly with the Fund. Default option will be Growth Option. Default sub-option will be Reinvestment of Income Distribution cum capital withdrawal sub-option. For detailed disclosure on default plans and options, kindly refer SAI.

Applicable NAV (after the scheme opens for subscriptions and redemptions)	Cut off timing for subscriptions/ redemptions/ switches: In case of Subscription/Switch-in for any amount: • In respect of valid applications received upto 3.00 p.m. on a Business Day at the official point of acceptance of transactions and where the funds for the entire amount of subscription/purchase as per the application/Switch-in request, are available for utilization before the cut-off time i.e. 3.00 p.m. - the closing NAV of the day shall be applicable. • In respect of valid applications received after 3.00 p.m. on a Business Day at the official point of acceptance of transactions and where the funds for the entire amount of subscription/purchase as per the application/Switch-in request, are available for utilization either on the same day or before the cut-off time of the next business day - the closing NAV of the next Business Day shall be applicable. • Irrespective of the time of receipt of application at the official point of acceptance of transactions, where the funds for the entire amount are available for utilization before the cut-off time on any subsequent Business Day - the closing NAV of such subsequent Business Day shall be applicable. In case of investments through Systematic Investment Plan (SIP), Systematic Transfer Plans (STP), Other STP methods as may be offered by the AMC, IDCW Transfer, Trigger etc. the units would be allotted as per the closing NAV of the day on which the funds are available for utilization irrespective of the instalment date of the SIP, STP or record date of IDCW etc. Since different payment modes have different settlement cycles including electronic transactions (as per arrangements with Payment Aggregators/Banks/Exchanges etc), it may happen that the investor's account is debited, but the money is not credited within cut-off time on the same date to the Scheme's bank account, leading to a gap/delay in Unit allotment. Investors are therefore urged to use the most efficient electronic payment modes to avoid delays in realization of funds and consequently in Unit allotment. **Redemptions including switch-outs:** In respect of valid applications received upto 3.00 pm on a business day by the Mutual Fund, same day's closing NAV shall be applicable. In respect of valid applications received after the cut off time by the Mutual Fund, the closing NAV of the next business day shall be applicable.

Minimum Application Amount/ Number of Units	**Fresh Purchase (lumpsum):** Rs. 500/- and in multiples of Re. 1/- thereafter **Systematic Investment Plan (SIP):** Rs. 500 and above: minimum 6 instalments. **Minimum amount for switch-in:** Rs. 500 and in multiples of Re. 1. Two-Factor Authentication will be applicable for subscription as well as redemption transactions in the units of Mutual Fund. Minimum application amount will not be applicable for investments made in the scheme pursuant to SEBI Master Circular for Mutual Funds dated March 20, 2026, on alignment of interest of designated employees of the AMC with the unitholders of mutual fund schemes. For more information, please refer SAI. **Additional Purchase:** Rs. 100/- and in multiples of Re. 1/- thereafter. **Redemption:** **Minimum redemption amount -** Rs. 500 and in multiples of Re. 0.01/- or the account balance of the investor whichever is less. **Minimum amount for switch-out -** Rs. 500 and in multiples of Re. 0.01/- or the account balance of the investor whichever is less.
Despatch of Redemption Request	Within three working days of the receipt of the redemption request at the authorised centre of the Bajaj Finserv Mutual Fund.
Benchmark Index	Nifty 500 Multicap 50:25:25 TRI
Dividend Policy	The Scheme may declare IDCW subject to the availability of distributable surplus and approval from Trustees. IDCW would become payable to the unitholders whose names appear on the register of unitholders on the record date as fixed for the scheme. The IDCW declared will be paid net of tax deducted at source, wherever applicable. There is no assurance or guarantee to the Unit holders as to the rate of IDCW distribution nor that the IDCW will be paid regularly. If the Fund declares IDCW, the NAV of the Scheme would stand reduced by the amount of IDCW paid. All the IDCW payments shall be in accordance and compliance with SEBI, Stock Exchange Guidelines, as applicable from time to time. IDCW is the amount that can be distributed out of equalisation reserve which is part of the sale price that represents realised gains. Any IDCW upto Rs. 100/- shall be compulsorily reinvested in the same option under the scheme at prevailing NAV on record date.
Name of the Fund Manager including the tenure for which the fund manager has been managing the scheme	Mr. Nimesh Chandan and Mr. Sorbh Gupta (Equity portion) Mr. Siddharth Chaudhary (Debt portion) All Fund managers are managing the scheme since inception.

Exit load is applicable for each purchase of units through Lumpsum / switch-in / Systematic Investment Plan (SIP) and Systematic Transfer Plan (STP). The Scheme will not levy exit load in case the timelines for rebalancing portfolio as stated in SEBI Master Circular for Mutual Funds dated March 20, 2026, is not complied with.
</td></tr>
</table>
*For the purpose of charging of the exit load, units would be considered on First in First out (FIFO) basis. Any imposition or enhancement of exit load shall be applicable only on prospective investments.

The load on other types of transaction could be Income Distribution cum Capital Withdrawal reinvestment, Switch in/out, SIP/SWP/STP (as applicable)

In case of redemption/switch undertaken in excess of 25% holding of an investor on account of compliance with the requirements of SEBI Master Circular for Mutual Funds dated March 20, 2026, shall not be subject to exit load imposed in the scheme.

Exit load (if any) charged to the unitholders by the Mutual Fund on redemption (including switch-out) of units shall be credited to the respective scheme net of Goods & Services Tax.
Goods & Services Tax on exit load, if any, shall be paid out of the exit load proceeds.
</td>
</tr>
</table>

	No exit load would be charged for switch transaction from this scheme to any another equity scheme of Bajaj Finserv Mutual Fund. Further, switches of following kind within the scheme would not attract any exit load: (i) switch from Direct Plan to Regular Plan; (ii) switch from Regular Plan to Direct Plan; (iii) within different Options (Income Distribution cum capital withdrawal /growth) of the same Plan (Direct/Regular) of the scheme. Load on bonus/ re-investment of Income Distribution cum capital withdrawal units: In terms of SEBI Master Circular for Mutual Funds dated March 20, 2026, no entry and exit load shall be charged on bonus units or units allotted on reinvestment of Income Distribution cum capital withdrawal. The Trustee / AMC reserves the right to change the load structure any time in future if they so deem fit on a prospective basis. The investor is requested to check the prevailing load structure of the scheme before investing. In case of changes to load structure, the AMC would endeavour to do the following: 1. An addendum would be attached to the SID and Key Information Memorandum (KIM). The same may be circulated to brokers/distributors so that the same can be attached to all SID and abridged SID in stock. Further the addendum would be sent along with a newsletter to unitholders immediately after the changes. 2. Arrangement would be made to display the changes in the SID in the form of a notice in all the official points of acceptance of transactions and distributor's/broker's office. 3. The introduction of the exit load along with the details may be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load. 4. A public notice shall be provided on the website in case of changes undertaken to the exit load. The AMC/Trustee reserves the right to change / modify the Load structure of the Scheme, subject to maximum limits as prescribed under the Regulations. However, the Redemption /Repurchase Price will not be lower than 97% of the NAV as per SEBI Master Circular for Mutual Funds dated March 20, 2026.
