Current Debt Market Outlook

Policy Stability in a Supportive Macro Backdrop

RBI maintains status quo

The RBI in its MPC held on 6th February 2026, kept the repo rate unchanged at 5.25% and retained a neutral stance, widely in line with market expectations. The decision reflects confidence in domestic macro conditions amid rising global uncertainty. Policy rates across the corridor were left unchanged.

Source : MOSPI, RBI. Data as per the MPC policy held on 6th February 2026.

The Inflation-Growth dynamics: The Policy Cushion

RBI Projections	Time period	Dec MPC	Feb MPC	Change
Inflation	FY25-26	2%	2.10%	Slight rise
	Q3	0.60%		
	Q4	2.90%	3.20%	Slight rise
	Q1 FY27	3.90%	4.00%	Slight rise
	Q2 FY27	4.00%	4.20%	Slight rise
Growth	FY 25-26	7.30%	7.40%	▲
	Q3	7%		
	Q4	6.50%		
	Q1 FY 27	6.70%	6.90%	▲
	Q2 FY27	6.80%	7.00%	▲

- Headline inflation remains benign in the near term and is projected to stay close to target through early FY27. The upward revision to inflation projections for FY26 is largely attributed to precious metal prices, not broad-based pressures.
- Food inflation risks are contained due to healthy agricultural output, buffer stocks and favourable rabi prospects. Core inflation is expected to remain range-bound.
- Inflation dynamics remain supportive of growth-oriented policy.
- The RBI assessed the inflation–growth balance as favourable. Growth momentum remains strong, supported by consumption, investment and services activity, while inflation remains well below the tolerance band.
- This combination provides policy space to prioritise growth without compromising inflation credibility.

Bajaj Finserv Banking and PSU Fund Seizing the opportunity

Riding the Yield Curve: Explained

The below stated graph is an illustration and should not be taken as an investment strategy or as an investment advice.

Riding the yield curve refers to a fixed-income strategy where investors purchase long-term bonds with a maturity date longer than their investment time horizon.

Investors then sell their bonds at the end of their time horizon, profiting from the declining yield that occurs over the life of the bond.

For example, an investor with a 3-Yr investment horizon may buy a 5-Yr bond because it has a higher yield, the investor sells the bond at the 3-Yr date but profits from the higher 5-Yr yield.

If interest rates falls and /or yield curve shape changes to normal from the current flat yield curve shape, then riding the yield curve is considered to be profitable strategy.

Please note that 'Riding the yield curve' is one of several investment approaches, and its performance is not guaranteed. The fund manager retains the prerogative to amend or alter the strategy as required by the regulation. This is subject to change owing to change in market conditions and opportunities available for investments.

What are Banking and PSU Fund?

1 Short term to medium term

The Banking and PSU funds are debt funds that invest in bonds of banks and public sector companies.

2 Invest in debt fund

As per SEBI guidelines for mutual funds, Banking and PSU Funds invest at least 80% of their assets in debt instruments issued by banks and public sector undertakings.

3 Better credit quality

These funds have superior credit quality compared to other debt funds and they minimize risk by investing in top-rated debt instruments.

4 Optimizes opportunity

Banking and PSU funds maintain an optimum balance between liquidity, safety, and yield.

Where will our scheme invest?

For detailed list of instruments where the fund can invest, please refer to the SID section – “How will the Scheme allocate its assets??”

Please note that 'Riding the yield curve' is one of several investment approaches, and its performance is not guaranteed. The fund manager retains the prerogative to amend or alter the strategy as required by the regulation. This is subject to change owing to change in market conditions and opportunities available for investments.

Potential MTM Opportunity in AAA Corporate Bond

The following table highlights the scenario analysis of how in case of interest rate change over the coming year, an investor may expect a certain range of performance in 5-year banking and PSU debt.

Scenario Analysis in Case of Change in Rate with a 5-year AAA PSU Corporate Bond Portfolio				
Interest Rate Change in bps during a year	Present YTM (in %)	Modified Duration*	M-T-M Gain (in %)	Gross annualised Gain (%)
100	7.65	3.2	-3.20	4.45
75	7.65	3.2	-2.40	5.25
50	7.65	3.2	-1.60	6.05
25	7.65	3.2	-0.80	6.85
0	7.65	3.2	0.00	7.65
-25	7.65	3.2	0.80	8.45
-50	7.65	3.2	1.60	9.25
-75	7.65	3.2	2.40	10.05
-100	7.65	3.2	3.20	10.85

Note: This table is provided for illustrative purpose to explain the concept of MTM opportunity owing to changes in interest rates.

Why Invest in Bajaj Finserv Banking and PSU Fund now:

Presently, the yield curve shape has largely flattened - indicating uncertainty in the market regarding allocation to the long duration of the curve.

The 5-year yields are presently trading at a higher level than the 10-year duration maturity.

Having said that, we believe that we are likely to see bull steepening in the curve going ahead.

The inclusion of India in the emerging market bond Index, expectation of a rate cut in the medium term, and the mean reversion of yields are some of the likely triggers for the potential bond rally in the market in the future.

This rally is likely to provide reasonable mark-to-market gains for the investor who holds a medium to long-term investing view.

Even if the investment thesis were not to play out, the markets are presently offering a relatively high yield. Investors can lock-in the present yield levels and hold-to-maturity.

Who should invest?

Individuals seeking to construct a foundational debt portfolio for short to medium-term investment Horizon.

Individuals dissatisfied with the performance of traditional fixed-income options.

Individuals who want relatively stable investment option for their capital

Investors interested in diversifying their Portfolio across various Debt Investments apart from other traditional Banking products.

Who should
Invest?

Bajaj Finserv Banking and PSU Fund Strategy: Keeping all options open

Please note that 'Riding the yield curve' is one of several investment approaches, and its performance is not guaranteed. The fund manager retains the prerogative to amend or alter the strategy as required by the regulation.
