An Open Ended Dynamic Asset Allocation Fund

May 2026

How does our brain process and make decisions?

Left Brain

- Slow
- Deliberate
- Analytical
- Conscious
- Tires quickly
- Lazy

Driven By
Information, Data,
Logical Reasoning

Right Brain

- Fast
- Automatic
- Intuitive
- Instinctive
- Subconscious
- Involuntary

Driven By
Emotions And Intuitions

Our emotions often overpower our logical thinking

Our brain is a complex organ that has evolved over millions of years to help us navigate the challenges of life

It has developed advanced logical thinking abilities

However, it also retains more primitive, emotional, and instinctual responses that can sometimes override our logical thinking

Emotions frequently steer us away from making rational decisions

How our emotions override logical reasoning:

Procrastination

Starting a task early and working on it consistently is the logical approach, but our emotions often lead us to procrastinate until the last minute.

Spending Money

Making impulsive purchases or spending beyond our means because of the momentary joy of acquiring something.

Skipping Exercise

The emotional pull to stay in our comfort zone can make us skip workout sessions.

Stress Eating

When stressed, we might indulge in comfort foods even though we're aware that it's not a healthy coping mechanism.

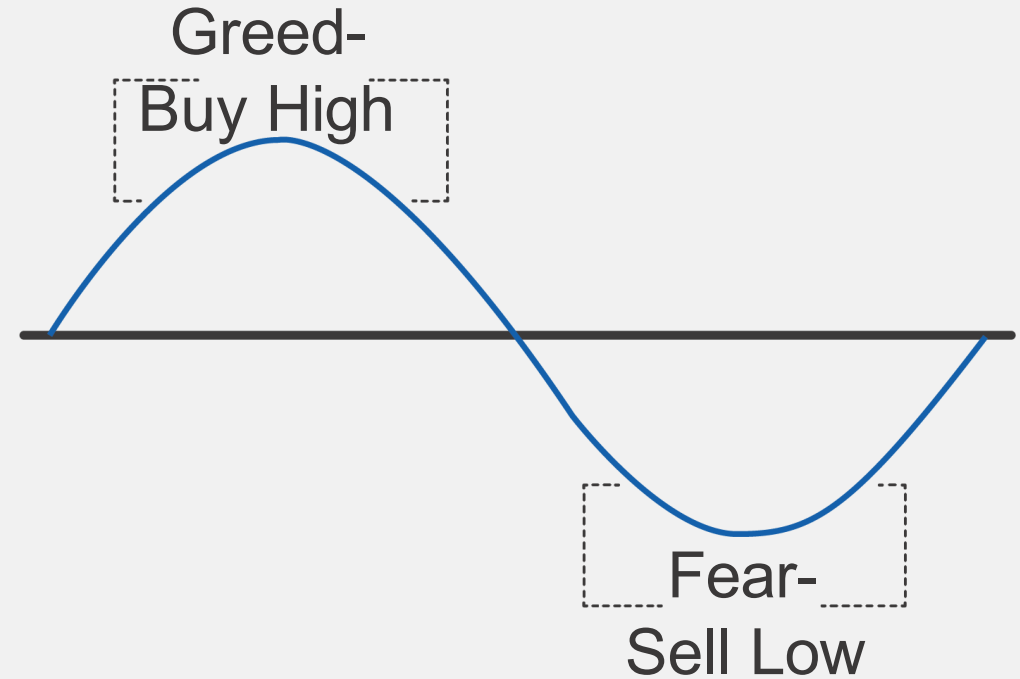

Our emotions override logical reasoning while making investment decisions as well

We get swayed by Greed and Fear while investing

What we should do

What we end up doing

Our investment decisions get impacted due to various emotional biases

Regret Aversion Bias

Clinging to loss making choices to avoid regret leads people to continue with loss-making decisions in down cycles.

Trend-Chasing Bias

Focusing on past performance, ignoring other factors.

Loss Aversion Bias

Fear of loss prevents from seeking gains.

Herd Mentality Bias

Following the crowd without independent analysis.

Market volatility impacts our emotions & behaviour

Nifty 50 Index delivered a CAGR of 12.96%*

People feel optimistic and positive when the market peaks and anxious when the market nose-dives

Introducing
Bajaj Finserv

Balanced Advantage Fund

(With Behavioural Edge)

Market trends basis fundamentals and liquidity

Approach

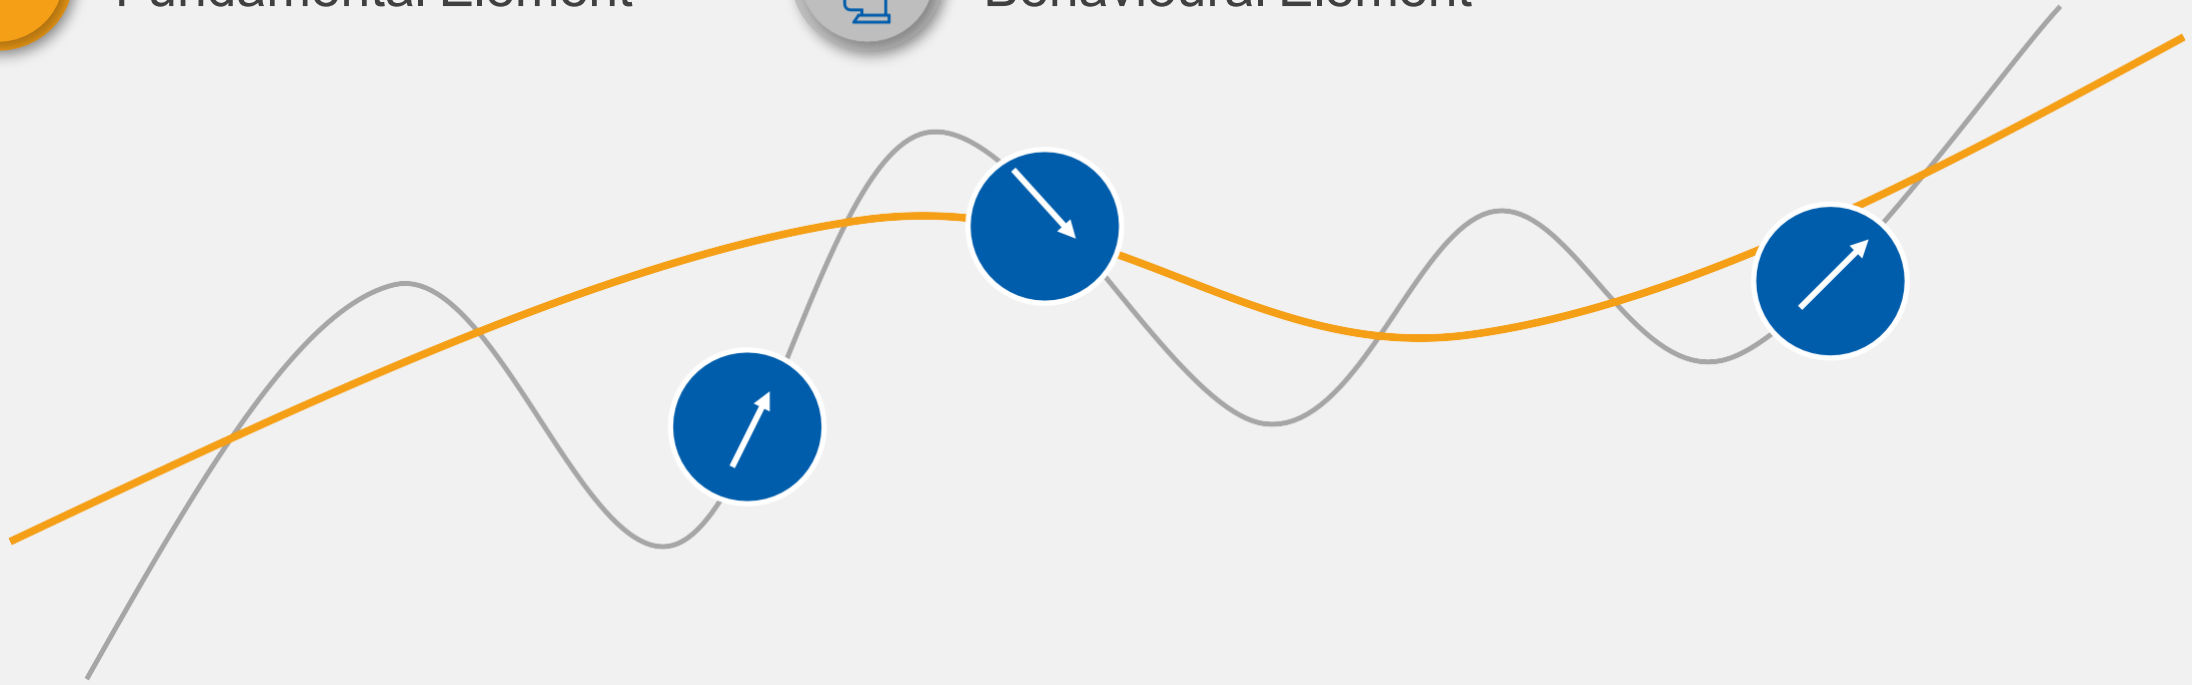

What moves the market?

Fundamental Element

Behavioural Element

The stock market is the story of cycles and of the human behaviour that is responsible for overreactions in both directions.

- Seth Klarman

With Bajaj Finserv **Balanced Advantage Fund**, emotions take a back seat, and logic steers the ship.

**Indicative allocation and this can change based on market conditions and investment opportunity available *Includes Net Equity & Arbitrage

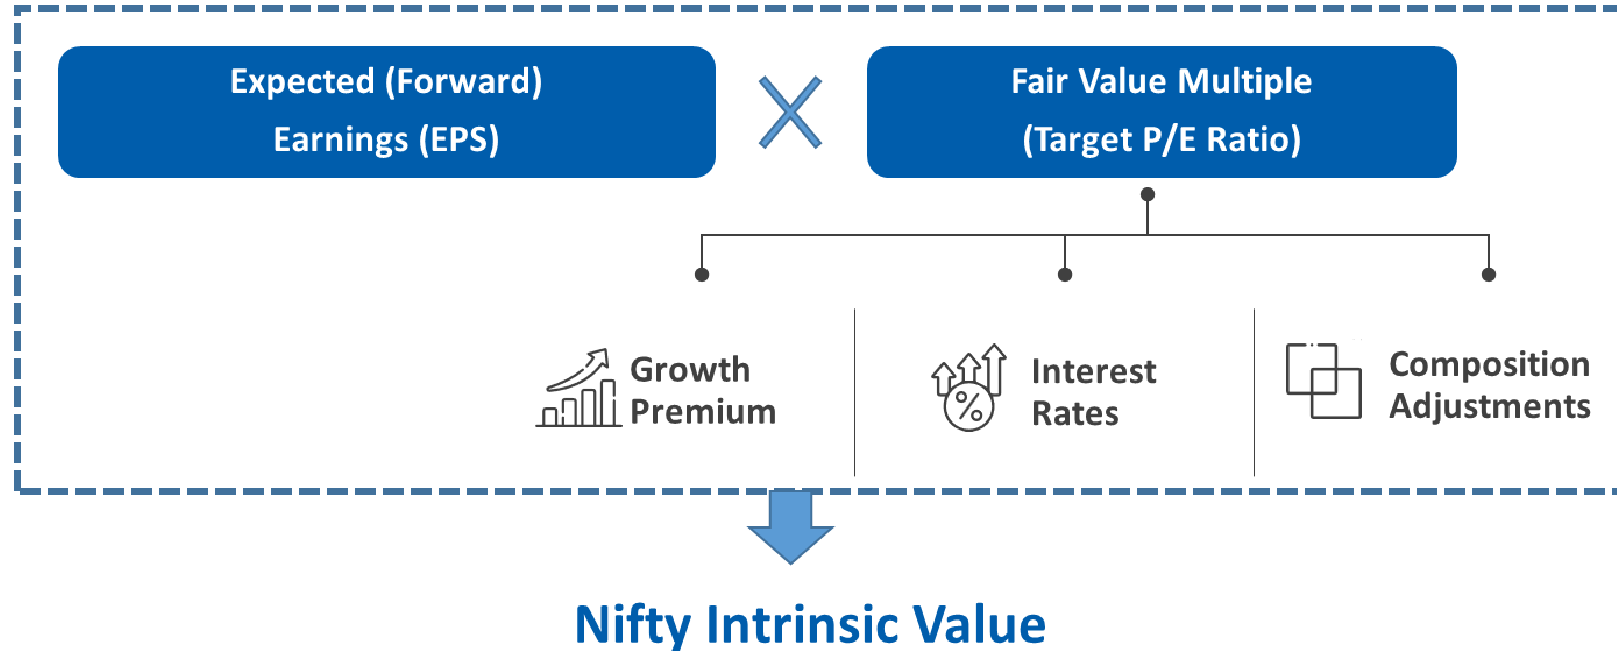

The fund model will determine market's intrinsic value & make behaviour based adjustments. It will change the asset allocation accordingly and rebalance the portfolio from time to time.

Bajaj Finserv Balanced Advantage Model = Fundamental + Behavioural

Bajaj Finserv Balanced Advantage Fund - Model Overview

Satellite Allocation basis Market Sentiment Lead Indicator

Currency

Commodity

Fixed Income

Equity

- Estimate market's intrinsic value: Forward EPS, growth premiums, and interest rate.
- Gives core allocation signal.
- Sentiment analysis: Using commodities, currency movements, yield indicators.
- Signals early warnings of market cycles, both bullish and bearish.
- Together, the two broad indicators confirm and indicate market entry and exit points.

Fundamental Elements

Which fundamental elements move Nifty 50?

- Nifty 50 has a **very weak correlation with GDP** – constituents and weights
- But, has a **strong correlation** over long term to **earnings**

$$\text{Ideal Nifty 50}^* = \text{Ideal Earnings}^* \times \text{Ideal Valuation}^*$$

Ideal Earnings is Forward Earnings

Ideal Valuation is Comparative and not Absolute

*Based on Internal Analysis

Factors	Interplay
 <p>Currencies</p>	<p>Certain currency pairs reveal the mood and the bias of the currency market whether they are in risk-on mode or are operating as safe haven.</p>
 <p>Commodity</p>	<p>Studying commodities price movement between energy, industrial, precious, and soft commodities reveals the broad commodities view regarding the economy and the business outlook across the world.</p>
 <p>Bond</p>	<p>Spread between the emerging and developed market; corporate bond and government securities; slope of the yield curve; captures the sentiment of bond traders and prevailing global liquidity.</p>
 <p>Equity</p>	<p>Equity investors reveal their view and sentiment about the equity market through choices of market cap and position between different sectors.</p>

Fundamental Elements

Ideal Valuation (Comparative)

P/BV

- Values Assets
- Less volatile than earnings but way less representative
- Many businesses in Nifty 50 are asset-light

Thus, P/BV can not be used broadly for all sectors

M-Cap/GDP

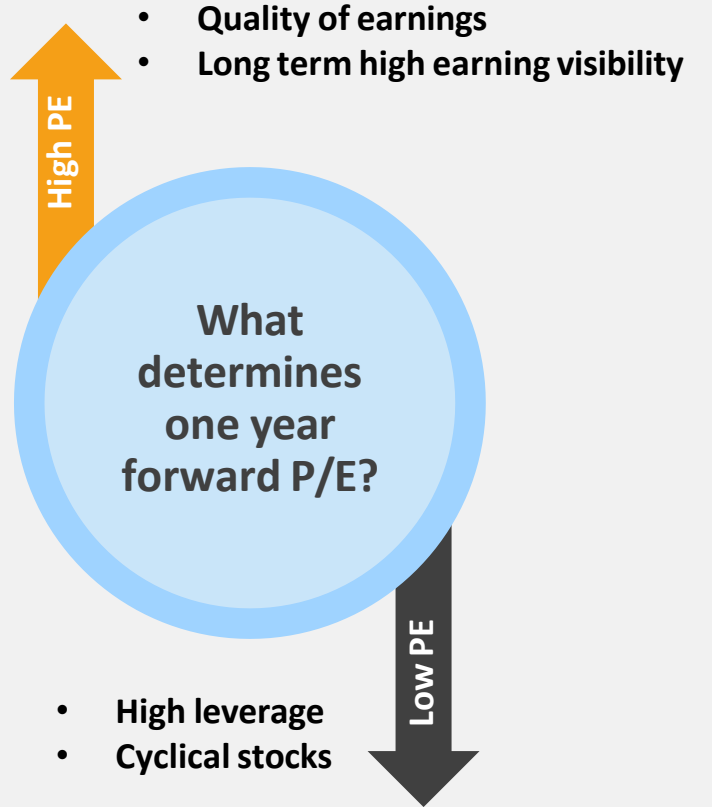

- Ignores quality of business, keeps trending higher

Thus M-Cap/GDP can not be used broadly for all stocks/businesses

**Hence P/E :
Though tough,
remains Appropriate!**

P/BV- Price/Book Value, M-Cap – Market Capitalization, GDP – Gross Domestic Product, P/E – Price/Earning

*Based on Internal Analysis

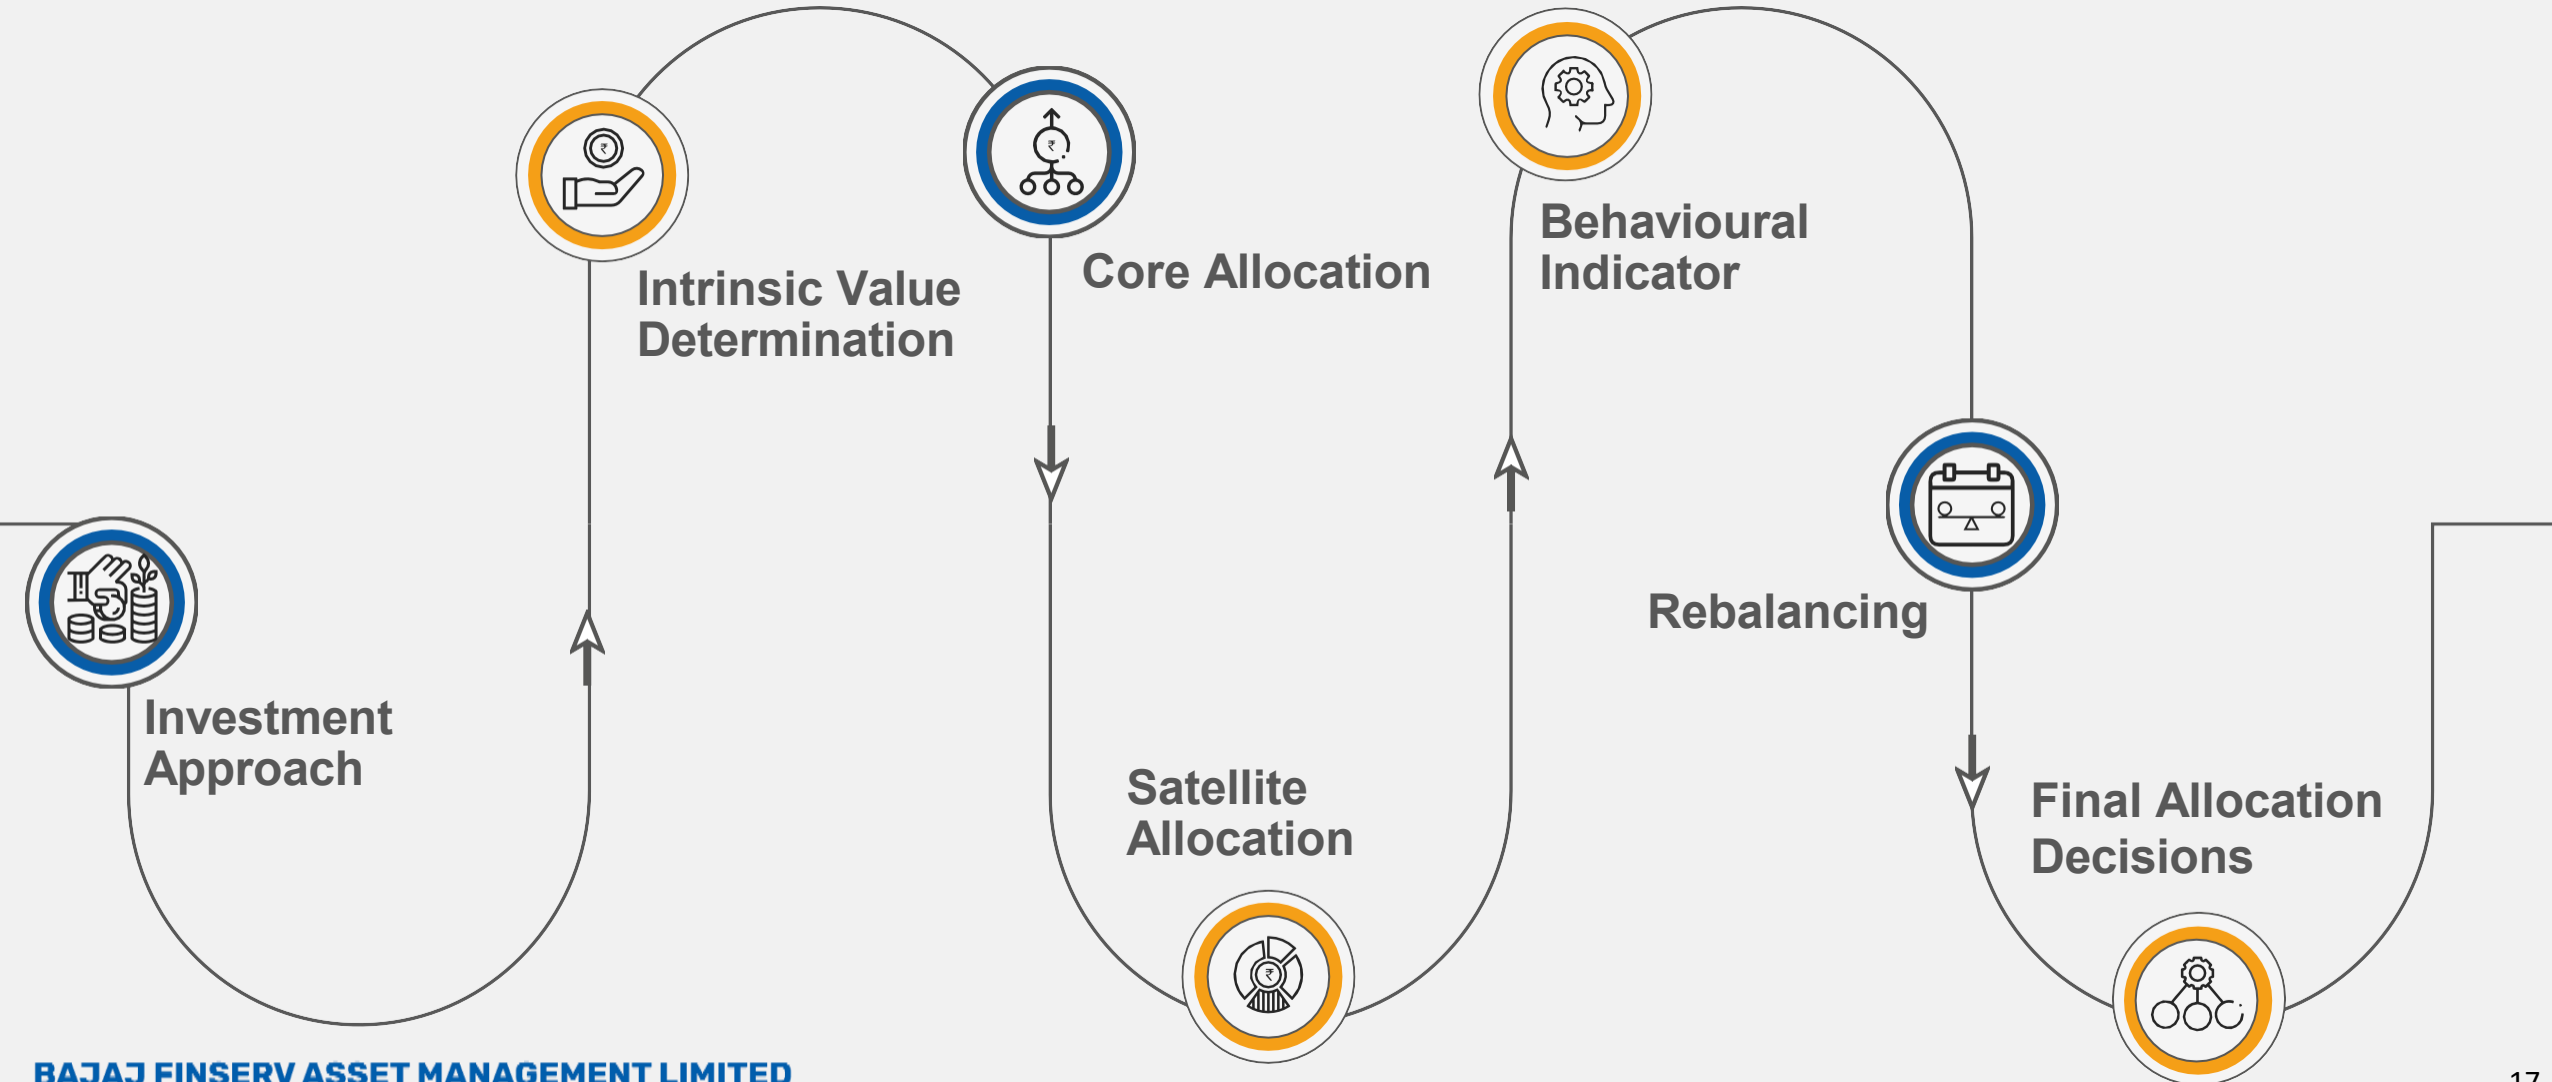

Ideal Earning*
One year Forward
Earning

Ideal Valuation*
One Year Forward
P/E

How does it work?

The fund follows a proprietary INQUBE investment philosophy that combines informational, quantitative, and behavioural edges for competitive performance.

Portfolio Approach

Equity Portfolio

- Flexi cap approach
- Prefer Large cap orientation

Debt Portfolio

- Short to medium term duration
- Investment in highly rated securities
- To anchor and support core performance

Who Should

Invest?

Investors who

Want to add dynamic asset allocation to their portfolio

Want diversification in their portfolio

Seek professional fund management

Want potential capital appreciation with mitigation of downside risk

Have long-term investment horizon

Benefits of investing in Bajaj Finserv Balanced Advantage Fund

Dynamic Asset Allocation

Navigate Market Volatility

Optimizing Returns

Risk Management

Long-Term Perspective

Adapting to Change

Tax Efficiency

■ Portfolio Allocation
 ■ Increased Portfolio Allocation
 ■ Decreased Portfolio Allocation

Combining fundamental and behavioural finance principles provides a key advantage in managing investments. Our proprietary asset allocation model at Bajaj Finserv AMC is based on those two elements namely: fundamental analysis and behavioural insights. It ensures that our Balanced Advantage Fund is well-positioned to navigate market complexities and deliver long-term value to our investors. By understanding the interplay of various market factors, we can make informed decisions that align with our investors' goals, fostering financial growth and stability. This unique approach helps us determine the optimal asset allocation between equity and debt, providing an edge for our investors.

Fundamental Indicator:

Our fundamental indicator focuses on the Nifty 50 Index, analysing its ideal earnings and valuations. Ideal earnings are forward-looking estimations, while ideal valuations are comparative, offering a realistic assessment rather than absolute measures. This robust analysis forms the backbone of our model, ensuring a sound foundation for asset allocation.

Behavioural Indicator:

The differentiation in our model lies in the behavioural indicator, which measures behavioural and sentimental trends in the market by monitoring four key factors: **currencies, commodities, bonds, and equities**. Let's explore how each of these factors contributes to our asset allocation strategy:

- Reflect risk appetite.
- Risky currencies signal optimism; safe havens show caution.
- Helps predict capital flows into Indian equities.

- Rising prices = strong economy; precious metals up = uncertainty.
- Guides sector allocation (energy, industrials) based on economic cycles.

- Yield spreads & curves show investor sentiment and liquidity.
- Narrowing spreads = confidence, steep curve = growth expectations.
- Guides equity investment in growth sectors.

- Large-cap focus = stability; small/mid-caps = higher risk.
- Sector rotations signal where investors see growth or safety.
- Informs strategic asset allocation.

The sequence, relationship and nature of trends in these assets helps understand and anticipate market movements driven by psychological factors, leading to more informed and effective investment decisions. By integrating behavioural insights with fundamental analysis, our model offers a comprehensive approach to asset allocation, optimizing returns while managing risks.
